

OPTIMIZE WI-FI EXPERIENCES ACROSS THE ENTERPRISE

7 SIGNAL® x jamf

Jamf + 7SIGNAL Enable Visibility into Endpoint Performance on macOS.

IMPROVED CONNECTIVITY ACROSS YOUR MACOS FLEET

7SIGNAL is the leader in enterprise Wi-Fi optimization, offering an AI-powered, cloud-based Wi-Fi optimization platform that improves connectivity and mitigates risk. Together with Jamf, the 7SIGNAL platform offers industry-leading WLAN monitoring and measurement tools for macOS user devices and endpoints, bolstered by the trust and security features from Jamf.

macOS

PASSIVE AND ACTIVE WI-FI EXPERIENCE TESTING TO TROUBLESHOOT ISSUES

7SIGNAL's discreet, on-device agents collect Wi-Fi performance data for rapid issue remediation and to strengthen endpoint experiences

VISIBILITY INTO THE HEALTH OF ENTERPRISE WI-FI

The 7SIGNAL platform uses experience data from on-device agents and hardware sensors to understand network performance from the outside-in (the end-user's perspective)

DEPLOYED BY JAMF AND COMPATIBLE WITH ENTERPRISE FLEET AND BYOD MACOS DEVICES

With Jamf's Trusted Access program, 7SIGNAL can provide connectivity insights and Wi-Fi troubleshooting assistance, no matter how your organization operates

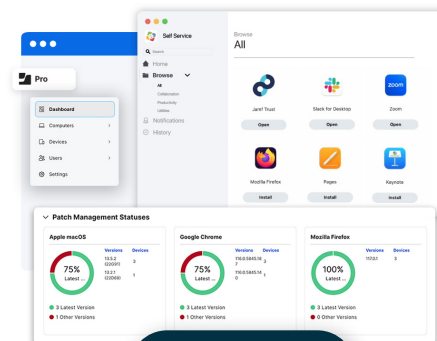

IMPROVE LONG-TERM ENDPOINT PLANNING

7SIGNAL data can be used in tracking the long-term performance of endpoint assets, helping inform upgrade decisions across the fleet
